HOW TO MEASURE
→ A Letterbox ←

Door Thickness

Cut-Out Width

Cut-Out Height
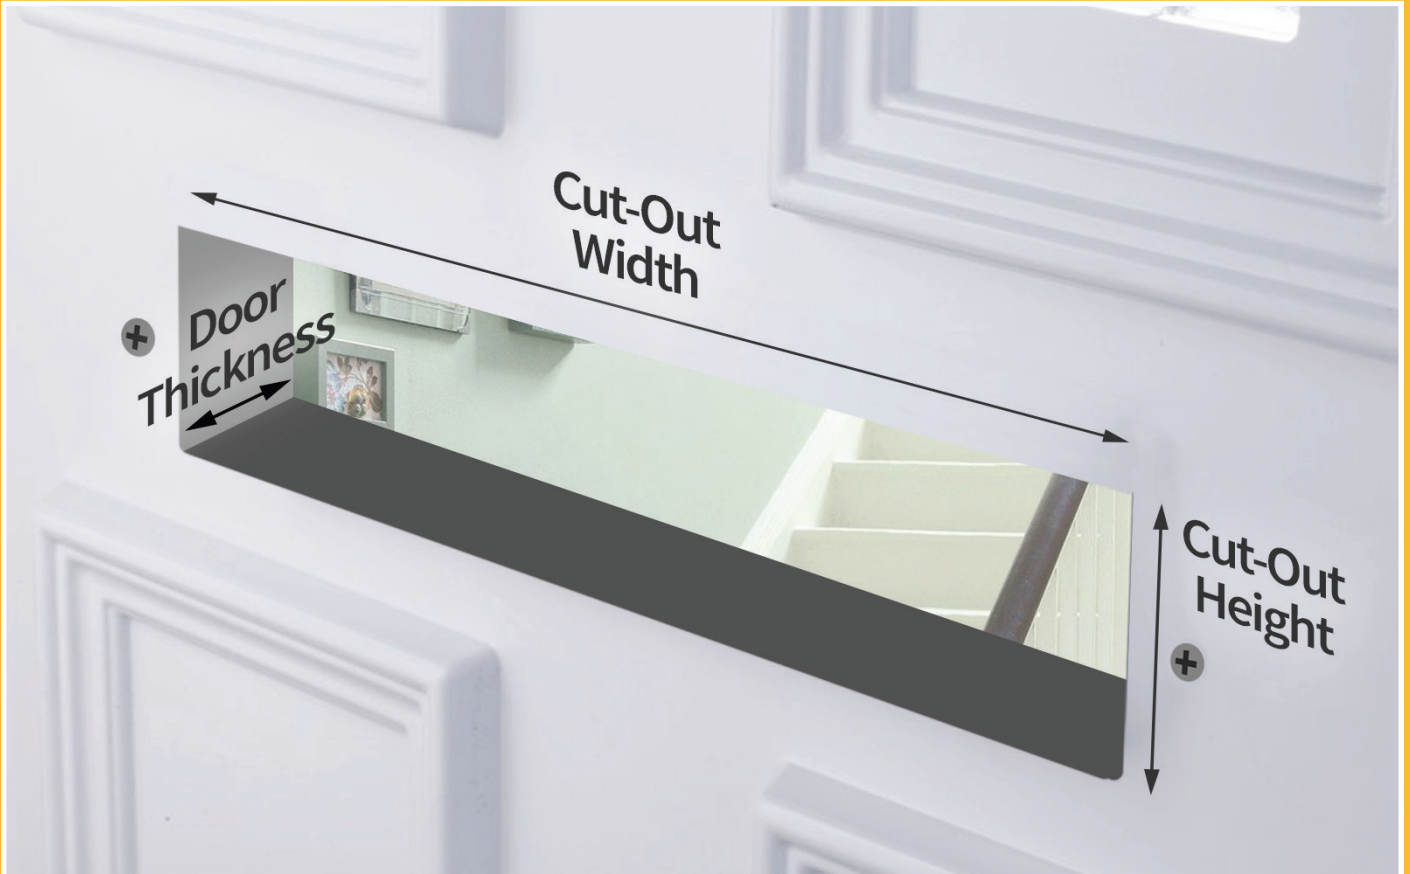

Measurement Guide

1. Measure your cut-out width, and your cut-out height *(this is known as aperture)* to the nearest mm.
2. Measure the thickness of your door the nearest mm.
3. Choose the quality of letter plate to fit your door.

Note: If ordering a Yaleseal 10" or 12" letter-plate and your door is 18mm-38mm thick then you will need to order the 20-40 option. If your door thickness is 38mm-78mm then you will need to select the 40-80 option.

Measure your aperture here:
