For sealing façade elements	X	X	X	X	X	X	X
For sealing glazing materials	X	X	X	X			
For sealing of pedestrian walkways	X	X	X	X			

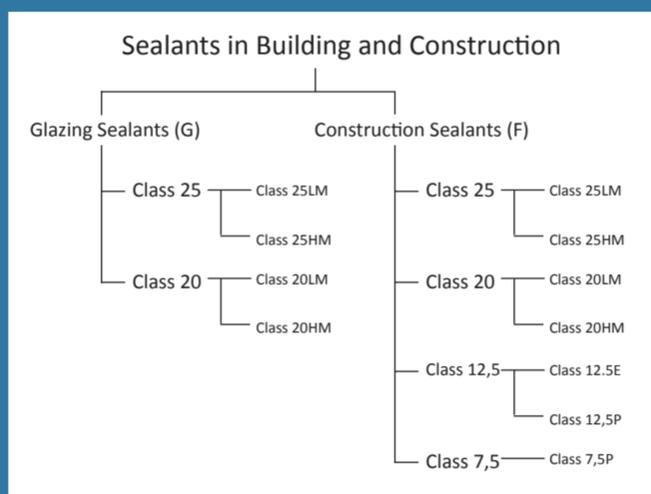

A Guide to ISO 11600 Classification

The ISO 11600 Sealant Classes

There are 11 classes of sealant covered by the current ISO 11600 classification scheme.

- Four describe glazing sealants (Type G)
- Seven describe construction sealants (Type F - standing for Façade)

The 11 classes are:

ISO 11600 Designation

In the sealant selection process the specifier matches his requirements to the products available on the market. Sealants classified using the ISO 11600 scheme are described in the producer's technical literature and on packaging labels using a designation which indicates the following:

- **END USE** - Construction (F) or glazing (G)
- **MOVEMENT CAPABILITY** - in the range 7.5% to 25%
- **MODULUS** - high (HM) or low (LM) as defined in ISO 116600
- **ELASTICITY** - elastic (E) or plastic (P)
